Daniel Ekechukwu

Front-End Developer | Lagos, Nigeria | creativedannyk@gmail.com | [Portfolio](#) | [Linkedin](#) | [Github](#)

Summary

Results-driven Full-Stack MERN Developer with over 3 years of professional experience in designing, developing, and deploying scalable web applications. Strong expertise in MongoDB, Express.js, React, and Node.js, with proficiency in PostgreSQL (Neon) for modern database solutions. Experienced in building RESTful and GraphQL APIs, implementing authentication systems, and optimising application performance. Proven track record of delivering end-to-end solutions independently and collaboratively, working effectively with cross-functional teams and clients. Detail-oriented professional committed to writing clean, maintainable code and staying current with industry best practices. Passionate about leveraging the MERN stack to create robust, user-centric applications that drive business value.

Tools & DevOPS: Git · GitHub · GitHub Actions · Docker · CI/CD · Postman · Webpack · npm · WordPress · Figma · Google Analytics · Google Search Console · VS Code · Copilot

Development Skills: Full-Stack Web Development · MERN Stack Development · API Development & Integration · Database Design & Management · Authentication & Authorization · Server-Side Rendering · State Management · Test Driven Development · Agile Methodologies · Technical Writing · Content Creation · Search Engine Optimization ·
Soft Skills: Problem Solving · Public Speaking · Taking Initiative · Self-Learning · Emotional Intelligence · Team Collaboration

Work Experience

Innova Technologies

Full-Stack Developer | January 2025 - Present

- Develop and maintain full-stack web applications using the MERN stack (MongoDB, Express.js, React, Node.js)
- Build responsive UI components and implement seamless user experience improvements
- Design and implement RESTful APIs and integrate third-party services
- Optimise database queries and application performance for scalability

Fobework

Front-end Developer April 2025 - September 2025

· As a Front-end Developer, I build UI components, responsive design and user experience improvements.

Dream Alliance

Full-Stack Web Developer | September 2024 - Present
- Built, optimised, and deployed the company website using modern full-stack technologies
- Conducted a comprehensive audit of the existing website and infrastructure
- Developed a detailed website with integrated blog functionality and content management
- Implemented server-side logic and database architecture for dynamic content delivery
- Applied SEO best practices and configured Google Analytics and Google Search Console
- Established secure authentication and authorisation systems

Multiple Clients

Full-Stack MERN Developer | September 2023 - Present
- Design and develop robust, scalable full-stack applications using the MERN stack for diverse client needs
- Build and maintain RESTful and GraphQL APIs with Node.js and Express.js
- Implement database schemas and queries using MongoDB and PostgreSQL (Neon)
- Develop authentication and authorisation systems with JWT and session management
- Lead end-to-end development from requirements gathering, system design, implementation, testing, to deployment
- Create and maintain comprehensive technical documentation for client projects
- Integrate third-party APIs and services to extend application functionality
- Deploy applications to cloud platforms and implement CI/CD pipelines

NeutroLabs

Front-end Web Developer (contract) February 2024 - June 2024

· As a front-end web developer at Neutrolabs, I collaborated with diverse individuals and cross-functional teams to deliver efficient, user-friendly, and visually appealing interfaces tailored to client needs.
· Developed and implemented responsive, scalable, and maintainable front-end code using modern web development technologies and frameworks.
· Implemented and maintained new features and functionalities, seamlessly integrating backend services and API's while adhering to agile methodologies.
· Worked closely with engineers and designers to define clear specifications and deliver innovative, problem-solving designs. · Optimised front-end workflows by establishing efficient build pipelines, integrating version control (GitHub), and collaborating with cloud platforms for testing and deployment.
· Ensured scalability and performance of web applications, keeping user satisfaction and accessibility as top priorities.

Kolabamiwuye & Co

Web Developer/IT Support January 2023 - April 2023

· As a web developer, I built, optimised and deployed their company website.
· I was tasked with designing a suitable UI for the website.
· Built a website that best outlined the needs of the company.
· Incorporated different strategies to best capture the services of the company.
· I used the best SEO practices, deployed their website, created a mailing system for them and linked it to their email accounts.

Maxfront Technologies

Frontend Web Developer (intern) January 2023 - June 2023

· I started and completed the internship program with MaxFront Technologies. I Where I practised working with API's and functioning with a team.

Education and Qualifications

Abia State University
B.Sc | Computer Science

Spoken Languages

French- Fluent and conversant
